Your property transformed by 100% eco-friendly cleaning

Whether it's a roof, brickwork, render or stone... our cleaning systems can make them look like new

If your property is looking a little worse for wear, and you're looking for a way to bring the external appearance up to scratch, we have the exact services you need.

We cover the full range of exterior cleaning services. This includes everything from the roof, right down to the driveway and everything in between. We're a local company with a wide experience of cleaning properties in Devon and Cornwall. Our operatives are fully-trained, CRB checked, and we carry £10 million of public liability insurance.

Eco-friendly cleaning techniques

Even better, our methods are 100% environmentally-friendly. We use the power of pure steam to clean away dirt and grime. See below for details.

James Marks, CCS Commercial Cleaning

Roof Cleaning

We clean all types of roofs, whether natural slate, regular tiles, or concrete. Moss and algae disappear to allow the natural colour of your roof to show through

All types of roofs cleaned using our environmentally-friendly steam cleaning system. The 150-degree steam fully clears moss and algae, allowing the original surface to shine through. Using nothing but pure water, it causes no environmental damage whatsoever.

Keep the moss at bay for longer

Alternatively, we can clear the moss manually and use the Softwash system to remove stains. Either procedure can be followed by an antibacterial treatment to ensure your roof stays looking good for longer.

Clearing your roof of moss also protects it from damage and cuts the risk of the need for expensive maintenance and repairs.

Render Cleaning

Cleaning for the full range of renders, including K Rend and Weber. Algae and weather stains are swept away to reveal the original, vibrant render colour

From stained and unattractive...

to clean and eye-catching

Our systems can handle any type of render, whether sand and cement render, or proprietary renders such as K Rend, Weber or Monocouche. Give a dazzling new look to your property by sweeping away algae and weather stains to reveal the original colour.

Eco-friendly steam cleaning lifts away dirt, moss, and algae without the need for harsh chemicals. The gentle nature of steam ensures that the render's integrity is maintained, preventing any potential damage.

Alternatively, the Softwash system is a tailored treatment designed to cater to the specific needs of each render type. While it's tough on stains, Softwash is gentle on the render, preserving its original appearance and texture.

Brick and Stone Cleaning

Our environmentally-friendly steam cleaning can fully rejuvenate brick and stone, even when covered with years of grime and weather stains

Original colours show through

Cleaned by the power of steam

Harsh cleaning methods might clean the brickwork, but often damage it, leading to costly future repairs. This is why we use low-pressure steam cleaning to remove moss and weather stains.

Unlike traditional high-pressure power washing, steam cleaning uses low pressure and high temperatures, reaching up to 150 degrees Celsius. This effectively kills moss, algae, and other microorganisms, while ensuring the brickwork and mortar remain undamaged.

Cleaned without damage

The same applies when it comes to stone cleaning. Steam cleaning penetrates the porous surface of the stone to lift dirt, grime, and moss and algae, all without causing any structural damage.

Gutters, patios, driveways

We can also provide gutter cleaning, and patio and driveway cleaning if the jobs are large enough or as part of a larger project such as a roof or render clean

Gutter cleaning for residential and commercial properties

Our gutter cleaning service unblocks your gutters, removes moss, leaves and all debris. To clean your gutters and make them clear and free-flowing, we use our high-reach gutter cleaning system.

This enables us to clean gutters at any height, remove gutter blockages, and make sure your gutters are doing the job of protecting your property from rainwater damage.

We carry out cleaning on driveways made of concrete, block paving, and brick. Our driveway cleaning systems remove moss and algae and leave it without a stain. The same goes for patios and decks.

We can use eco-friendly low-pressure steam cleaning or jet washing, which uses high-pressure water jets to remove the grime.

What other people say

Take a look at what other satisfied customers have said about our cleaning and our excellent levels of service

The results are excellent

The results are excellent and I now have a lovely clean roof on my bungalow. The guys left the area clean and tidy and I can only highly recommend CCS

Colin Jackson

The cleanest roof in the street

Amazing job of cleaning my roof. The guys worked all day. I now have the cleanest roof in the street. Well done, guys. I would recommend you to anyone

Susan Crutchfield

Transformed my 50-year-old roof

Transformed my 50-year-old roof and it now looks like new. Cleared up the entire area afterwards. An extremely friendly and professional service throughout

Viv Swift

Made a huge difference

Above all else, the work was excellent! We have a listed doorway on a busy high street, and the visible difference across the whole building was really exciting to see

Rupert Morrison

Great experience from start to finish

Contacted CCS about stonework that needed professional attention within a castle. Great experience from start to finish, and wouldn't hesitate to use again. Stone looks great

Amanda Davies

The end result was impressive

Can honestly say that all dealings were friendly, helpful and polite. I had two mature, sensible professional local guys, and the end result was impressive

Chris Luckhurst
